DOCKETED

RE: Docket Number E-01933A-12-0291

JUN 06 2013

Commissioner Stump and the Corporation Commission:

I urge you to adopt the energy efficiency standard for Tucson Electric Power as part of the pending rate case. Arizona is spending billions to import energy from out of state, when that money could be spent here, on technological advancement and education to improve energy efficient programs.

I am a citizen of Tucson and a small business owner in the TEP territory. Electricity costs are a significant expense in my monthly budget; increasing energy efficiency would give me some much needed savings.

Also, as a Tucson resident, I would like to see less fossil fuel burning so close to my home. Clean air is important to me; burning less fuel by increasing efficiency will lead to a healthier community.

Thank you for considering more energy efficiency for TEP.

Regards,

Michael Ray
